

## Surgical Pathology Report

### SPECIMEN(S) RECEIVED

A: Left colon, biopsy  
B: Omentum, biopsy  
C: Left ovarian fossa, biopsy  
D: Left periureteral, biopsy  
E: Left uterosacral ligament, biopsy  
F: Left cul de sac, biopsy  
G: Cul de sac adhesion, biopsy  
H: Uterus and bilateral ovaries

### CLINICAL INFORMATION

PELVIC PAIN, BLEEDING

### PRE OP DIAGNOSIS

PELVIC PAIN, BLEEDING

---

### FINAL DIAGNOSIS

- A. Left colon, biopsy:  
Adipose tissue within normal limits.
- B. Omentum, biopsy:  
Fibrous tissue within normal limits.
- C. Left ovarian fossa, biopsy:  
Fibroadipose tissue within normal limits.
- D. Left periureteral, biopsy:  
Fibroadipose tissue within normal limits.
- E. Left uterosacral ligament, biopsy:  
Fibroadipose tissue with focal microcalcification.
- F. Left cul de sac, biopsy:  
Fibroadipose tissue within normal limits.
- G. Cul de sac adhesion, biopsy:  
Fibroadipose tissue within normal limits.
- H. Specimen submitted as "uterus and bilateral ovaries", supracervical hysterectomy and bilateral salpingo-oophorectomy:  
Secretory phase endometrium.  
Myometrium, bilateral ovaries and fallopian tubes within normal limits.

**COMMENT:**

IHC on representative part D, E and G show scattered histiocytes by CD68 and reactive mesothelial cells by WT1/calretinin, negative for ER.

---

**GROSS DESCRIPTION**

The specimen is received in 8 parts.

Part A, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 1 cm. in greatest dimension. Entirely submitted.

Part B, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 2.5 cm. in greatest dimension. Entirely submitted.

Part C, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 1.2 cm. in greatest dimension. Entirely submitted.

Part D, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 2.2 cm. in greatest dimension. Entirely submitted.

Part E, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 2.2 cm. in greatest dimension. Entirely submitted.

Part F, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 1.5 cm. in greatest dimension. Entirely submitted.

Part G, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 1.2 cm. in greatest dimension. Entirely submitted.

Part H, Received in formalin labeled as "uterus, bilateral fallopian tubes and ovaries" is a supracervical uterus measuring 6.5 x 5.8 x 4.8 cm and weighs 119g. The right fallopian tube measures 5 x 0.8 cm and the right ovary measures 2.5 x 2 cm. The left fallopian tube measures 5 x 0.8 cm and the left ovary measures 3 x 2.8 cm. Serial sectioning of the uterus reveals unremarkable triangular endometrial cavity and the endometrium measures 0.2 cm in thickness. The myometrium, ovaries and fallopian tubes are unremarkable. Representative sections are submitted as following: H1, anterior endomyometrium; H2, posterior endomyometrium; H3, right fallopian tube and ovary; H4, left fallopian tube and ovary.
