

Surgical Pathology Report

SPECIMEN(S) RECEIVED

A: Left ovarian ligament, biopsy
B: Left periureteral, biopsy
C: Left ovarian fossa, biopsy
D: Left uterosacral ligament, biopsy
E: Right cul de sac, biopsy
F: Right periureteral, biopsy
G: Right ovarian fossa, biopsy
H: Right uterosacral ligament, biopsy
I: Uterus, right fallopian tube and ovary

CLINICAL INFORMATION

PELVIC PAIN

PRE OP DIAGNOSIS

PELVIC PAIN

FINAL DIAGNOSIS

- A. Left ovarian ligament, biopsy:
Involved by endometriosis.
- B. Left periureteral, biopsy:
Fibroadipose tissue within normal limits.
- C. Left ovarian fossa, biopsy:
Involved by endometriosis.
- D. Left uterosacral ligament, biopsy:
Fibroadipose tissue within normal limits.
- E. Right cul de sac, biopsy:
Blood fibrin and separated fragments of endometrial tissue present.
- F. Right periureteral, biopsy:
Involved by endometriosis.
- G. Right ovarian fossa, biopsy:
Involved by endometriosis.
- H. Right uterosacral ligament, biopsy:
Fibroadipose tissue within normal limits.
- I. Uterus, right fallopian tube and ovary, supracervical hysterectomy and right salpingo-oophorectomy:

Myometrium with adenomyosis.
Endometrium, ovary and fallopian tube, within normal limits.

GROSS DESCRIPTION

The specimen is received in 9 parts.

Part A, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 1.2 cm. in greatest dimension. Entirely submitted.

Part B, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 1.2 cm. in greatest dimension. Entirely submitted.

Part C, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 1.2 cm. in greatest dimension. Entirely submitted.

Part D, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 1.4 cm. in greatest dimension. Entirely submitted.

Part E, received in formalin is (are) 1 piece(s) of pale brown soft tissue measuring 1.5 cm. in greatest dimension. Entirely submitted.

Part F, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 16 cm. in greatest dimension. Entirely submitted.

Part G, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 0.5 cm. in greatest dimension. Entirely submitted.

Part H, received in formalin is (are) 1 piece(s) of pale tan soft tissue measuring 1.8 cm. in greatest dimension. Entirely submitted.

Part I, received in formalin labeled as "uterus, right fallopian tube and ovary" is a supracervical uterus measuring 5.8 x 5.5 x 4.5 cm and weighs 93g. The attached right fallopian tube measures 5 x 0.8 x 0.5 cm and the right ovary measures 3 x 1.8 x 1 cm. Serial sectioning of the uterus reveals unremarkable triangular endometrial cavity and the endometrium measures 0.2 cm in thickness. The myometrium, ovary and fallopian tubes are unremarkable. Representative sections are submitted as following: I1, anterior endomyometrium; I2, posterior endomyometrium; I3, right fallopian tube and ovary.
